

## **M-Files Recognized as a Leader in Enterprise Content Management for Business Content Services by Independent Research Firm**

*Industry Analyst Firm Ranks M-Files Based on its Unique Metadata-Driven Approach, Strong Global Channel Program and Traction in Highly-Regulated Industries*

**DALLAS, TX, September 8, 2015:** M-Files Corporation, a provider of solutions that dramatically improve how enterprises manage documents and other information, today announced that the company has been positioned as a "Leader" in the [Forrester Wave™: ECM Business Content Services, Q3 2015](#), an evaluation of select enterprise content management (ECM) vendors.

The [Forrester Research](#) report recognizes M-Files as an enterprise content management solution that "...offers a unique metadata-driven approach to categorizing documents, a welcome move away from the folder-based interface used by most ECM vendors." The report also cites the company's strong channel global growth and traction in industries with demanding quality and compliance requirements, such as life sciences and manufacturing.

In addition to ranking M-Files as a "Leader," the report also acknowledges that the company "...continues to strengthen its presence in North America," and also highlights the company's cloud strategy by stating it "...supports the needs of enterprises seeking flexible hybrid options, enabling replication of documents from on-premises to cloud to meet remote access use cases."

"Being recognized as a 'Leader' in the ECM market by Forrester Research is a big honor, and it validates that we're delivering on our vision to dramatically improve and simplify how businesses manage and process information," said Greg Milliken, vice president of marketing at M-Files Corporation. "When you couple that with the fact that we're growing faster than any other vendor included in the report, and over 12x the rate of the overall market, it's clear that we're offering a solution that customers are enthusiastically embracing. The reason why Forrester Research, our customers and our partners recognize M-Files as one of the new ECM leaders is because, quite simply, M-Files works better. Our approach is unique because it meets demanding enterprise-class needs while remaining incredibly simple and intuitive. This drives user adoption and customer success."

The Q3 2015 Forrester Wave: ECM Business Content Services evaluated the 11 most significant ECM vendors to help enterprise architecture (EA) professionals select the right partner to manage their business' critical content. Forrester's 31-criteria evaluation of enterprise content management (ECM) business content was grouped into three high-level buckets - current offering, strategy and market presence. Selected vendors must meet specific inclusion criteria, including breadth of functionality, leadership in content management, a proven enterprise track record and interest from Forrester clients.

## **About M-Files Corporation**

M-Files enterprise information management (EIM) solutions eliminate information silos and provide quick and easy access to the right content from any core business system and device. M-Files achieves higher levels of user adoption resulting in faster ROI with a uniquely intuitive approach to EIM that is based on managing information by "what" it is versus "where" it's stored. With flexible on-premises, cloud and hybrid deployment options, M-Files places the power of EIM in the hands of the business user and reduces demands on IT by enabling those closest to the business need to access and control content based on their requirements. Thousands of organizations in over 100 countries use the M-Files EIM system as a single platform for managing front office and back office business operations, which improves productivity and quality while ensuring compliance with industry regulations and standards, including companies such as SAS, Elekta and EADS.
